

# ORBCOMM®

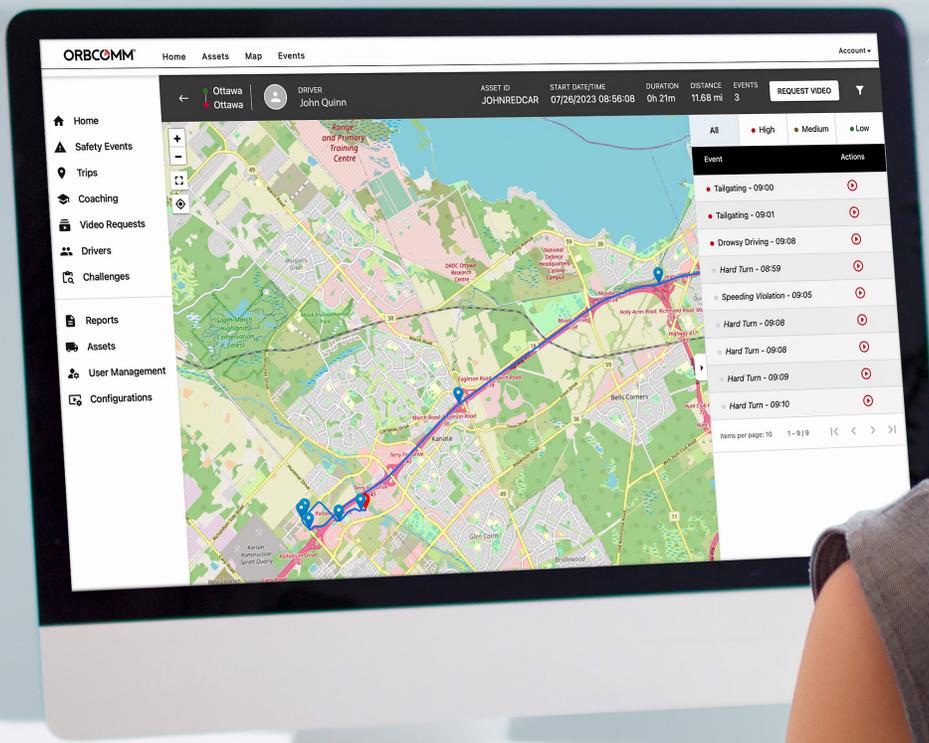

WHERE DATA DRIVES DECISIONS

## Protected. At every mile.

**Safety. Visibility. Efficiency. It's way more than just a dashcam.**

ORBCOMM's smart dashcam solution detects unsafe driving behavior and coaches your drivers to promote safety and fuel economy, tracks your vehicles, helps reconstruct accidents with data and video footage to shield you from insurance claims and so much more. Protect your drivers, protect your vehicles and protect your reputation with our smart telematics-enabled dashcam.

## Say hello to...

### Safer driving

Get customizable alerts when incidents occur so you can quickly see what happened and react. Identify and correct unsafe driving behavior on the fly with in-cab driver coaching to improve fleet safety, prevent spiraling insurance costs and protect customer relationships. Get driver-specific reports that identify coaching opportunities and highlight your top drivers to build a proactive fleet safety program.

### Increased oversight

Use location data and geofencing to see when your vehicles go off-route or operate outside of regular hours. Optimize routing and monitor arrival, departure and dwell times. Improve customer service by knowing exactly where your vehicles are.

### Reduced fuel consumption

Cut fuel waste and reduce vehicle wear by monitoring and correcting driving behavior like speeding, harsh acceleration, hard stops and unnecessary idling. Detect engine fault codes to protect vehicle fuel economy, inform maintenance decisions and drive uptime—all to help meet sustainability goals. Protect your reputation as a sustainable service fleet to win more business and differentiate yourself from the competition.

## A WATCHFUL EYE BEHIND THE WHEEL

The FM 6510 smart dashcam combines video AI, engine data and sensors to detect the unsafe driving behaviors that matter most, such as:

- Speeding
- Distracted and drowsy driving
- Cellphone use
- Tailgating
- Stop sign violations
- Harsh acceleration, braking and turning
- Vehicle crashes

Customize it to fit your needs with configurable thresholds for each behavior.

# What you get

## Dual-facing dashcam

Gain full visibility into your operations with a road- and driver-facing camera that captures high-definition video night and day. Driver privacy concerns? Turn off the driver camera at any time. Upload and analyze footage based on incidents or on driver and manager demand.

## In-cab coaching

Words matter. Protect drivers using in-cab voice coaching that tells drivers when—and what—they're doing wrong. Voice coaching is proven to be more effective than similar safety solutions that rely on beeps.

## Comprehensive accident reconstruction

Counter false insurance claims and protect brand reputation with accident reconstruction built from video, GPS location and speed from the moments before, during and after an incident: the ultimate proof for claims. Plus, with the push of a button, drivers can take full control of their safety by manually uploading video of events as they happen.

## Cloud-based convenience

With cloud storage, your data is safe, secure and easily retrievable—no matter what happens.

## Accurate speeding detection

Unlike other solutions that rely on reading street signs—which can be inaccurate in areas that are busy or have poor cellular service—our system reports speeds based on the speedometer and compares results against a built-in database with speed limits.

## Fast and easy installation

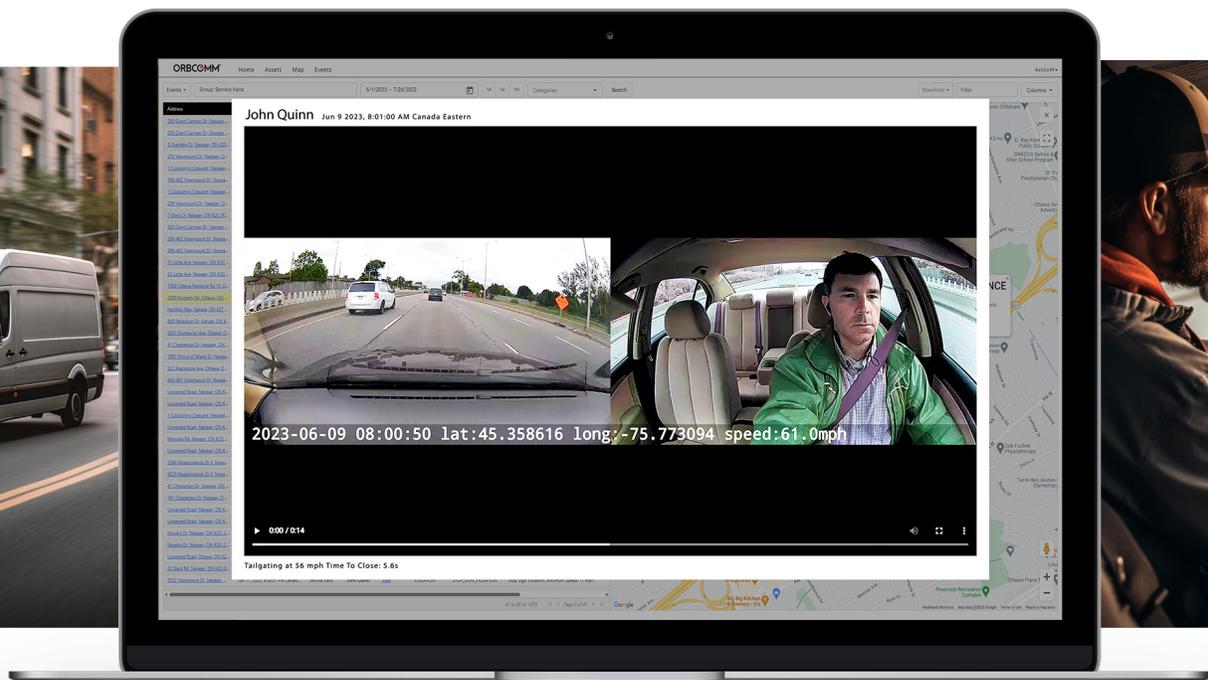

Install in as little as 20 minutes per vehicle for quick deployment. Unlike other dashcams that need to be hardwired, the FM 6510 plugs directly into the OBD port without the need for special tools or expertise.

## Simplified management

Quickly see which drivers should be coached or rewarded, along with critical safety events, all on a single dashboard for efficient management. Download key data with ease and share it with stakeholders as insurance claim proof or driver training material.

## Flexible pricing

Pay the way that works best for you: purchase the hardware upfront and pay low monthly data rates or buy with an affordable monthly subscription with no upfront cost.

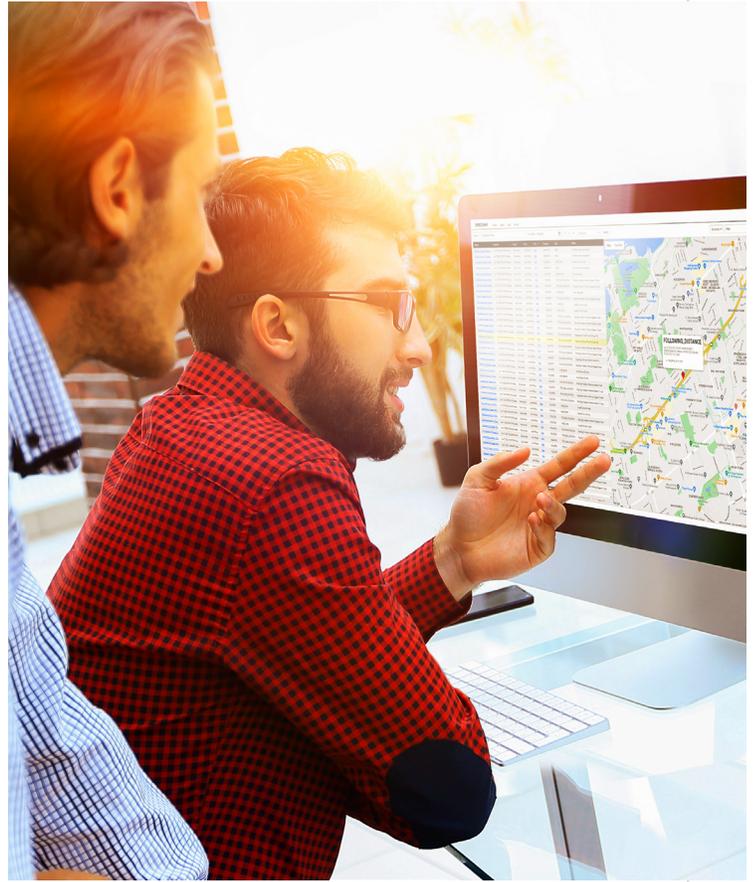

# Why ORBCOMM?

**1 Proven**  
Go with the experts. With over three decades as a global leader in industrial IoT technology, we've helped enterprise companies, small local carriers and everyone in between make data-driven decisions with our pioneering telematics solutions.

**2 Intuitive**  
Our solutions are built to be deployed quickly and easily so you can start making data-driven decisions fast.

**3 Ready to serve**  
Need help? Our global multilingual sales, service and technical support teams are at hand and ready to assist you.
