

FleetEdge

Heavy equipment and mining fleet management.

ORBCOMM's FleetEdge cloud application offers heavy equipment OEMs and operators complete fleet visibility, enhanced efficiency and improved maintenance practices.

Complete fleet visibility

Track heavy equipment with location reports, geofencing and time fencing to optimize utilization, find lost equipment, track stolen equipment and better manage project costs.

Enhanced operational efficiency

Monitor engine hours, idle ratios, mileage report alerts and equipment location to ensure assets are working effectively and identify issues before they result in downtime.

Improved maintenance practices

Deploy smart preventative maintenance by using engine hours and service alerts to optimize scheduling, limit breakdowns and improve equipment health.

Any machine, any fleet

We support all machines (OEM or leased) for simplified mixed fleet management regardless of asset type.

Easy to use

Customizable with white-labeling options

Advanced reporting and analytics

Tracks key operational metrics

Dynamic dashboard with custom widgets

Interactive graphs and charts

Multi-level administration and user access

Features

Custom views and favorites

Use filters and customize the application to display only information that's relevant. Assign favorites for enhanced monitoring efficiency.

Asset location

Know where your assets are. Scheduled reports: Schedule periodic equipment status, utilization and productivity reports to track engine hours and other operational metrics.

Custom reports

Create custom reports from a wide range of sensor data collected from field assets.

Event-based alerts

Receive real-time alerts via text and email when specific conditions are detected or thresholds are exceeded—engine warnings, geofence and timefence violations, low battery alerts and more.

Maintenance scheduling

Set thresholds to monitor equipment performance, manage maintenance schedules and receive notifications of upcoming service appointments to enable preventative maintenance.

Multi-language support

FleetEdge supports English, Spanish, French, German.

Multi-level access

Restrict access to different people in the organization based on roles for complete flexibility and control.

Interactive graphs and charts

Create custom charts and graphs from a wide range of parameters and data collected by the solution. Overlap multiple parameters for advanced analytics.

FleetEdge on the go

The ORBCOMM mobile app makes it possible for you to manage your heavy equipment on the go. Track the location of assets in real-time, monitor equipment status and utilization, receive alerts and more—all from the palm of your hand.

Although we strive to ensure accuracy in all of our published specifications, actual field performance can vary depending on a variety of environmental, installation and usage factors, as well as third-party factors such as cellular providers. The specifications listed are approximations, and do not constitute binding statements or modify the terms and conditions of purchase or lease including, but not limited to, product operational limitations and warranties. All specifications are subject to change without notice. Please check www.orbcomm.com to ensure you have the latest version of these specifications.
